Profile

Dedicated **Frontend Developer** with ITI Egypt internship. Skilled in **HTML5, CSS3, JavaScript/TypeScript**. Familiar with **React, Angular, Next.js** (front-end) and **Node.js, Express, GraphQL, Nest.js** (back-end). Experienced with **Swagger** for **APIs and PWA**. Developed **9 projects, 5** during internship.

Experience

Full Stack Developer by MERN (Intern)

Apr 2024 – Nov 2024 | Egypt

Information Technology Institute (ITI)

- Led a team of 5 interns to build a **Khamsat website clone** built by **Next.js** and a dashboard built by **Angular**, following **Agile** project management.
- Managed version control with **Git**, conducted **code reviews**, and deployed the project using **Vercel** across **2 projects**. Enhanced backend expertise across 3 full-stack projects, utilizing **Nest.js, Node.js, Express**, and **GraphQL**, along with **REST APIs** for efficient data management.
- Implemented **Swagger** for comprehensive API documentation and applied **unit-testing** using **Jasmine**.

Frontend Developer (Intern)

Nov 2023 – Mar 2024 | Egypt

Information Technology Institute (ITI)

- Developed several projects landing pages, creating 5 responsive websites using **HTML5, CSS3**, and **JavaScript**.
- Collaborated as a team member on a project with two versions, developing a **mother website** using **React** and **Material UI** to enhance user experience, while incorporating **Redux** for effective state management.
- Created a **mobile application** using **React Native** and **Material UI**.

Technical Skills

Programming Language: C#, JavaScript and Typescript.

Database: NoSQL, MongoDB and GraphQL.

Web Technologies: HTML5, CSS3, SCSS, SASS, Bootstrap, Tailwind, Material UI, ES6, JSON, jQuery & Ajax, ReactJS, React Native, Redux, NodeJS, NextJS, NestJS and AngularJS.

Tools: Git, GitHub, Postman, Canva, Figma and Photoshop.

Education

Faculty of Education, Alexandria University

Sep 2016 – May 2020

Degree (Good)

Projects

Khamsat Freelancing website: [\[GitHub\]](#)

- Developed a **Khamsat Clone** with multi-language support, a service marketplace, and real-time communication via **Socket.io**, using **Next.js** and **MongoDB Atlas** for performance and scalability.
- Integrated secure **PayPal** and **Stripe** payment gateways, and deployed the platform on **Vercel** for optimal performance and a responsive UI designed with **Tailwind CSS**.

Key Technologies Used: Next.js, MongoDB Atlas, Node.js, Tailwind CSS, Socket.io, PayPal API, Stripe API, Vercel.

Classy Social Media Platform: [\[GitHub\]](#)

- Constructed a **React-based** open-source social media platform with **3 core features**: content creation, user communication, and educator engagement.

Key Technologies Used: ReactJS, React Native, Node.js, MongoDB, Bootstrap and Material UI.

Mother Care: [\[GitHub-Webapp\]](#) || [\[GitHub-Mobile-App\]](#)

- Built web and mobile apps using **React** and **React Native**, offering **4 key features**: growth tracking, task management, shopping lists, and vaccination reminders.

Key Technologies Used: ReactJS, React Native, Node.js, MongoDB, Bootstrap and Material UI.
